

# Sure-Vent®

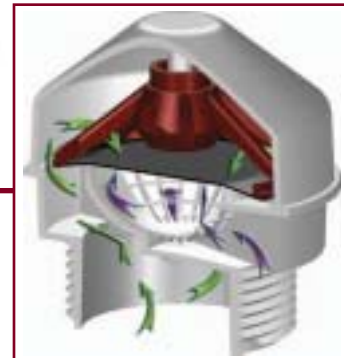

## There is No Substitute

Superior Sealing

Optimized DFUs

Unmatched Performance

### Why Sure-Vent®?

Because only Sure-Vent® AAVs ensure the tightest possible seal to keep sewer gases from entering the home. Yet Sure-Vent AAVs also open at the slightest change in pressure allowing the drainage system to function properly.

### What makes Sure-Vent® better?

The patented Sure-Vent® sealing technology uses a tension membrane for superior sealing performance. The tension membrane results in a Sweet Spot™ seal that closes and opens under the smallest change in pressure.
